TekTile's Flagship Flooring System

Available with Premium Finishes and Inbuilt Polyurethane (PU) Coating, the Design Tile is the next generation of heavy-duty, hidden interlock, loose lay Luxury Vinyl Tile (LVT). The Design Tile is the ideal solution for many types of high traffic space; having the aesthetics of ceramic tiles and hardwood flooring with the advantages of vinyl flooring. The Design Tile features a heterogenous construction, reinforced with fibreglass to create a flooring solution that will perform for many years to come.

Manufactured in the UK with sustainable manufacturing practices, our products are guaranteed to have outstanding fit and finish.

Manufactured with Precision, Consistency, and Longevity in mind

- Design Tile is a multi-layered interlocking loose lay vinyl tile with polyurethane treatment (PUR+), 7.8mm thick with a dovetail joint, abrasion group T (highest wear resistance group). It is manufactured using a continuous patented high pressure process. Reinforced with oblong fillers, Urban tile offers class-leading resistance to traffic.
- Design Tile is reinforced with an ultra-stable fibreglass grid on a pressed homogeneous layer.
- Design Tile backing is an homogeneous component made from ultra-stable material using a high pressure process.
- It is 100% recyclable and made with up to 80% recycled content.

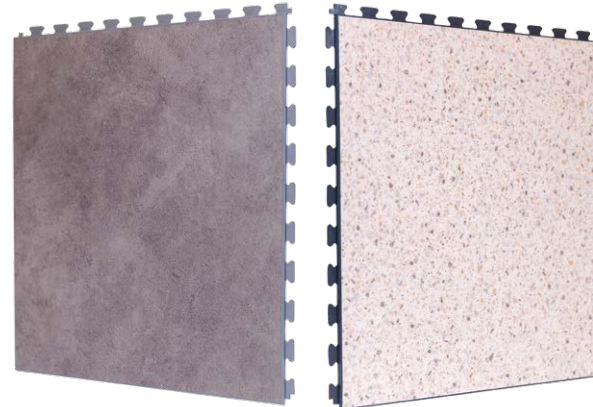

Reliability you can trust

TekTile flooring solutions can be found throughout Australia, Asia, Europe and the USA with an unparalleled reputation for quality and excellence. With 10 years limited TekTile Australia warranty, Design Tile is guaranteed to perform for years to come.

ADVANTAGES OF DESIGN RANGE

- Can be installed on most existing floors
- Saves time and cost
- Easy installation, maintenance and cleaning
- Fire Retardant Properties
- Low Volatile Organic Compound (VOC) emissions and recyclable
- Looks like ceramic and timber but performs like LVT (i.e. durable but pleasant to walk on)
- In retail environments, can be installed while store is trading in most circumstances
- Outstanding durability for heavy duty loads (i.e. suitable for pallet jacks and trolleys)
- Unique construction reduces ambient and impact noises

SUSTAINABLE MANUFACTURING

The TekTile range of tiles are designed and manufactured with the environment in mind. Once they have reached the end of their lifecycle, we can collect the tiles and recycle them to produce the next generation of TekTile products.

We are proudly manufacturing our tiles without any wastage as any rejected and surplus material is recycled.

COMPOSITION

FREE of Formaldehyde
FREE of heavy metals
FREE of solvent

LIFE CYCLE ANALYSIS

Eco-designed according to a product specific
Life Cycle Analysis
Product specific EPD (Environmental
Products Declaration) available
Manufactured in an ISO 14001 compliant site

MADE WITH RECYCLED CONTENT

Up to 80% recycled content is used in the
making of TekTile products

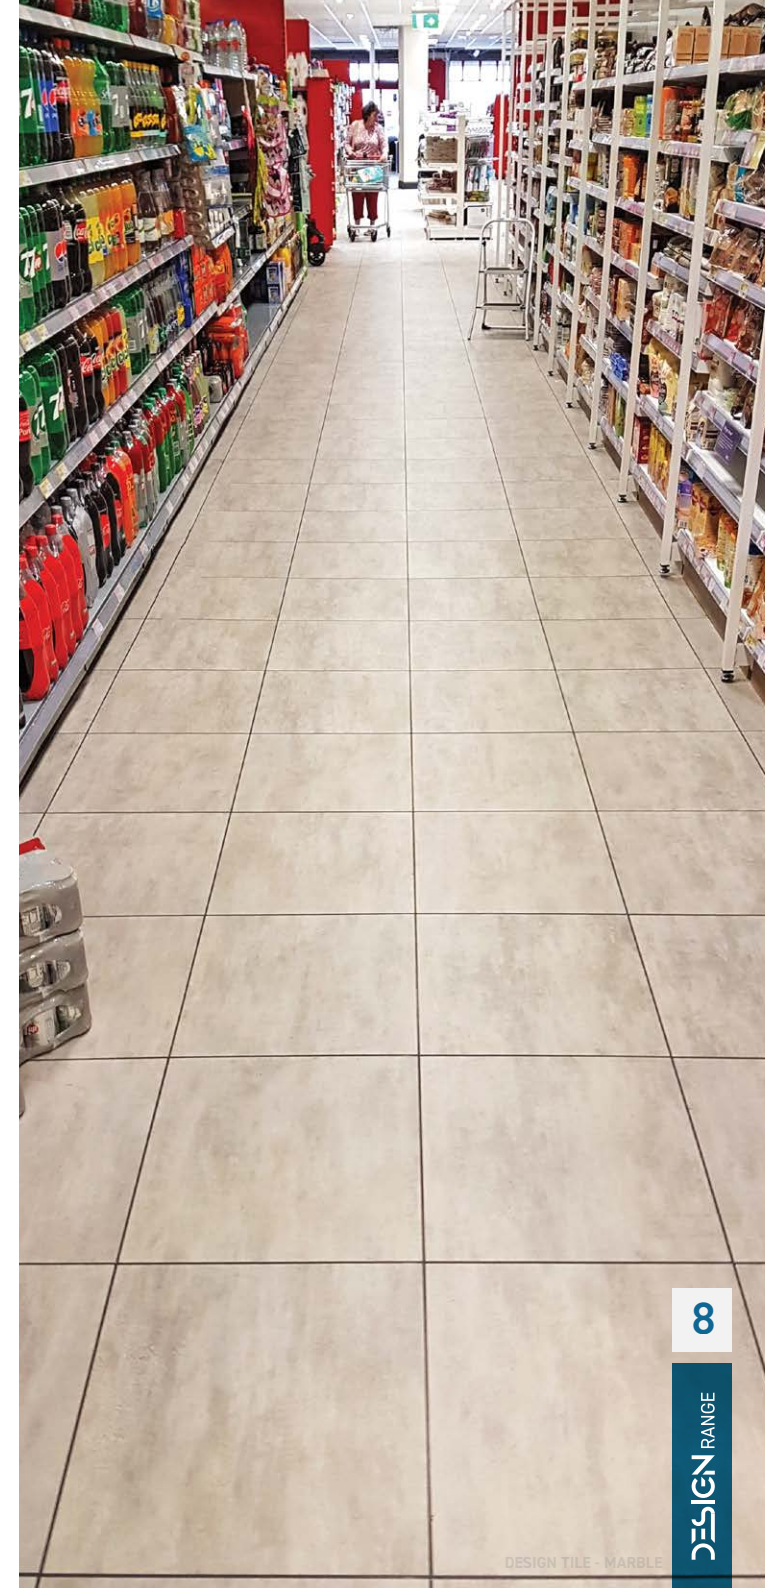

INSTALLATION

Adhesive free installation
(note: gluing around refrigerated cases is recommended)

RECYCLING

100% of the tiles can be recycled
at the end of the life cycle

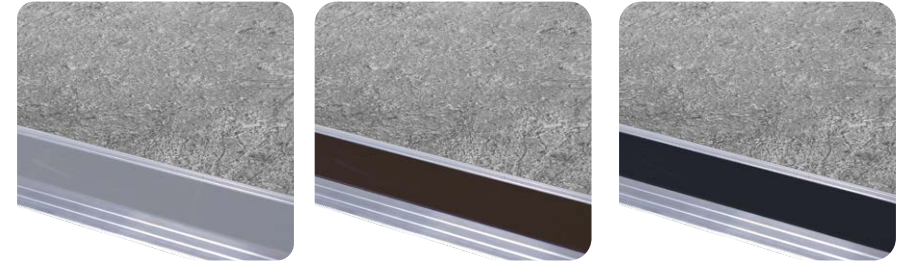

PROFILE EDGE ADD-ON

The Profile Edge is manufactured using high quality aluminium to withstand repeated foot and wheeled traffic impacts. It provides a safe transition between wood, tiles and other resilient floor coverings.

This profile incorporates a slip-resistant PVC insert available in 3 options: grey, black and brown.

Type:	Ramp Profile
Environment:	Interior
Material:	Aluminium/PVC
Width:	84mm
Gauge:	8mm
Length:	2.50m

ENTRANCE MAT ADD-ON

- Full kit ready-to-lay including the mat, frame sections and fastenings
- Withstands intensive foot traffic
- Surface not damaged (no adhesives or screws)
- Full 100% loose lay system
